

What we look for

Leadership

High-quality companies with excellent management teams that boast strong financial positions.

Familiarity

Companies in markets our team understands and that offer demographic or economic tailwinds.

Investment Managers

Tony Arsta, CFA

Michael Olsen, CFA

Past performance is not an indicator of future performance results, and there can be no assurance that future results achieved by clients will in any way resemble the above performance. See below for additional information.

Description

The International strategy seeks to add international exposure and increase overall diversification for our clients by owning what we believe to be some of the world's greatest companies along with ETFs for regions in which we identify promising growth potential broadly.

Using the same criteria by which we judge our domestic holdings, this strategy seeks to hold economically sound companies with extraordinary competitive advantages, great management teams, and a long runway for continued growth. As the growing middle class around the world continues to drive global economic growth, we believe this combination of local, high-quality companies and region-specific ETFs can potentially drive growth for our clients' portfolios too.

Please take a minute to review our Client Relationship Summary, which is available at <https://foolwealth.com/crs>. It's only two pages, but it provides important information about our firm and allows you to more easily compare our services to others in the financial industry. In addition, please see Appendix B to our Investment Advisory Agreement for a discussion of the risks associated with this strategy.

Industrials	21.5%
Financial Services	20.9%
Consumer Cyclical	12.1%
Communication Services	11.7%
Healthcare	10.3%
Technology	8.6%
Materials	5.7%
Consumer Defensive	4.0%
Real Estate	2.4%

Performance results are based on a representative account for each strategy ("Model Portfolio"). Each Model Portfolio is based on a real money portfolio and is funded with proprietary assets. Returns for periods longer than one year are annualized. Gross and Net Returns shown are in US dollars and reflect reinvestment of dividends and other earnings and are gross of withholding taxes, if any. Gross Returns are presented gross of advisory fees but net of commissions, ADR fees, underlying fund fees, and custodian fees. Net Returns are net of a model investment advisory fee (Model Fee) for the respective time period and are calculated and accrued daily based on the daily closing balance of the Model Portfolio, and charged in the subsequent month. The Model Fee for periods prior to October 1, 2017 was 1.15%, and 0.95% for periods beginning on October 1, 2017. The Model Fee for each period represents the highest fee charged to any client during that period, expressed as a percentage of assets. Actual advisory fees may vary depending on, among other things, portfolio size. Additional information regarding Fool Wealth's fees is available upon request and also may be found in our Client Relationship Summary (Form CRS) and in Item 5 of our Brochure (Form ADV Part 2A) (a link to each of these documents is provided below). Quarter To Date (or "QTD") returns are updated monthly to show performance from the start of the quarter to the most recent month end.

Clients should be aware that their individual account results may not exactly match the performance of the Model Portfolios for several reasons, including the timing of a client's investment, differences in account permissions and capabilities that impact the ability to trade or hold a model security, and trade restrictions initiated by the client.

Furthermore, the performance information provided is based on Model Portfolios held at Interactive Brokers, LLC ("IB"). Clients with accounts at IB should note that, IB, at their discretion, can remove any security from their list of securities eligible for fractional trading. Securities not eligible for fractional trading will have the fractional holding liquidated. If you hold less than one total share of a security that is no longer eligible, your position will be closed. IB will consider parameters regarding close price, average daily volume, or market cap to determine which shares are fractional eligible. To the extent IB removes fractional shares, those shares in your account are reverted to cash in your account. As a result, accounts with smaller holdings of a security may experience excess cash in their accounts as IB liquidates its fractional shares, which may cause you to incur capital gains. Additionally, the Model Portfolio may invest in a security that is not eligible for fractional shares and your account may not get invested in that position as a result. The liquidation of shares or positions not invested due to fractional share eligibility will result in a deviation from the Model Portfolio.

Clients who choose to hold their Personal Portfolio at Charles Schwab & Co., Inc. ("Schwab") should note that the performance of their Personal Portfolio(s) may differ (perhaps materially) from the Model Portfolio presented herein. Accounts held at Schwab lack fractional share functionality, meaning that these accounts can only hold full shares of securities. In order to keep accounts as fully vested as possible, MFWM will invest excess cash in ETFs that we believe offer comparable exposure to the desired asset class. Holding a significant amount of ETFs will result in further deviations from the Model Portfolio along with performance dispersion as compared to Personal Portfolios held in IB.

Clients custodied at Schwab and participating in our International Strategy are subject to ADR transaction fees every time an ADR is purchased or sold in their account. MFWM can apply a trade minimum to ADR securities to reduce the amount of transaction fees incurred for each ADR transaction. Trade minimums will vary as they are dependent on the price of the ADR.

During discussion with our Wealth Advisers, they may provide advice with respect to 401(k) and IRA rollovers into accounts that are managed by MFWM. Such recommendations pose potential conflicts of interest in that rolling retirement savings into a MFWM-managed account will generate ongoing asset-based fees for MFWM that it would not receive otherwise.

The performance information displayed above includes information describing certain periods of extreme market conditions, and such results should not be considered repeatable in future periods. To the extent a strategy invests more heavily in particular sectors or industries of the economy, your performance will be especially sensitive to developments that significantly affect those sectors or industries. Investments in foreign securities may involve risks such as social and political instability, market illiquidity, exchange-rate fluctuations, a high level of volatility, and limited regulation. A list of the risks associated with each strategy can be found in our

The S&P Global ex-US BMI (Broad Market Index) is a rules-based index measuring the performance of the global stock market, excluding the U.S. stock market. This index does not represent an actual investment. The International Strategy is not limited to securities comprising the index. Index returns are shown for comparison purposes only, and the International Strategy is not managed with a view towards targeting the performance of the index. The volatility of the index is different from that of the International Strategy.

Access to Motley Fool Wealth Management ("MFWM") is only available to clients pursuant to an Investment Advisory Agreement and acceptance of MFWM's Client Relationship Summary and Brochure, which are available at <https://foolwealth.com/iaa>, <https://foolwealth.com/crs>, and <https://foolwealth.com/adv>, respectively. You are encouraged to read these documents carefully.

Each Personal Portfolio is subject to an account minimum, which varies based on the strategies included in the portfolio. MFWM retains the right to revise or modify portfolios and strategies if it believes such modifications would be in the best interests of its clients, and we may modify allocations within a client's account subject to the constraints of each client's current risk score and objective. **Model Portfolios may or may not contain any specific security at any time, and decisions to invest should not be based on the presumed or current composition of any Model Portfolio.**

Holdings are unaudited and as of the "as of" date of this report, may not reflect holdings beyond that date, and do not include collateral received for securities loaned, if any. The unaudited holdings list is to be used for informational purposes only. Clients can see a current and complete list of their individual account holdings by logging into their account at Interactive Brokers. This list is for the general information. **The mention of these specific holdings does not constitute a recommendation by MFWM.**

For purposes of calculating sector exposure, we have excluded from the table cash (and cash equivalents) held by the Model Portfolio. With respect to ETF holdings, we conduct a "look-through" and have included each ETF's sector exposure (as most recently reported by the applicable ETF) in this table.

All investments involve risks and you may lose money. MFWM makes no assurance that investment objectives will be met.

MFWM, an affiliate of The Motley Fool, LLC ("TMF"), is an investment adviser registered with the U.S. Securities and Exchange Commission. MFWM is a separate entity, and all financial planning and investment advisory services are provided independently by the Wealth Advisers and asset managers at MFWM. No TMF analysts are involved in the investment decision-making or daily operations of MFWM. MFWM does not attempt to track any TMF services.
